

EXTENDED COVERAGE

FOR ON-HIGHWAY

NEW TRUCK CHASSIS PACKAGES COMPLETE PEACE OF MIND COVERED

Extended Coverage for on-highway chassis packages have been restructured to provide you with more complete protection long after your Freightliner® or Western Star® base warranty expires. Our new Basic, Enhanced and Ultimate truck chassis packages cover components focused on specific systems, including engine support, powertrain support, and software/safety systems support.

- 1 Repair work is typically pre-approved, eliminating potentially long waiting times for out-of-pocket repairs to be authorized.
- 2 Continue to rely on your same Freightliner or Western Star service center. If you're on the road, you have access to 500+ factory-authorized facilities throughout the U.S. and Canada.
- 3 Your choice of years/mileage options and basic to comprehensive coverage plans make it easy to build coverage and pay a price that best suits your business.
- 4 Combine truck chassis coverage with one of our Detroit® engine coverages to enjoy complete protection and peace of mind.

WHAT IS IT?

Extended Coverage for truck chassis allows you to extend your Freightliner or Western Star protection for time and mileage beyond the factory warranty period. Plans are tiered and designed to cover components focused on specific systems, including engine support, powertrain support, and software/safety systems support.

WHY IS IT VALUABLE?

OEM-backed Extended Coverage is the best way to control unexpected repair costs as well as the added business costs of downtime as your truck ages. The cost of Extended Coverage for truck chassis can cost far less than the cost of a few failures.

Ease budget challenges by rolling the cost of coverage into your truck's monthly payment. Later, pass coverage on to future owners without fees, enhancing your truck's resale value.
